ERRATUM

**Molecular Orbital Calculations on the Conformation of
Polypeptides and Proteins**

I. Preliminary Investigations and Simple Dipeptides

B. MAIGRET, B. PULLMAN AND M. DREYFUS

J. theor. Biol. **26**, 321-333.

On p. 331, Fig. 4(a) and (b) should be transposed.

TODD, N. B., Karyotypic Fissioning and Canid Phylogeny	445
LEWIN, S., Water Extrusion in Biological Reactions	481
LETTERS TO THE EDITOR	
KILKSON, R., Domain Effects in Membrane Transitions	497
HANNA, G. R. and JOHNSON, R. N., Simulation of Auditory Nerve Responses by a Neural Model	501
SPENCER, R. P., Physical Basis for Haase's Law of Fetal Growth	507

Index to Volume 26

- Active site of orotidine-5'-phosphate pyrophosphorylase, a theoretical study of. A study of some orotic acid derivatives and analogues by Hückel's method of molecular orbitals. I, 19
- ADAMS, G. H. (see SCHUMAKER, V. N.), 89
- Aggregation of slime mold, initiation of, viewed as an instability, 399
- Allosteric ribosome hypothesis: codon recognition, 83
- Amino acid turnover, analysis of a five-compartment system with continuous infusion and its application to the study of, 243
- Analysis of a five-compartment system with continuous infusion and its application to the study of amino acid turnover, 243
- ANNINOS, P. A., BEEK, B., CSERMELY, T. J., HARTH, E. M. & PERTILE, G., Dynamics of neural structures, 121
- Antigenic expression, regulation of, 47
- APFFEL, C. A. & PETERS, J. H., Regulation of antigenic expression, 47
- Approximation, power-law, dynamic solutions using a, 215
- Asymmetry of living systems, 417
- ATP in sperm flagella, diffusion of, 11
- Auditory nerve responses by a neural model, simulation of (letter), 501
- AUB, M. R. & WATERLOW, J. C., Analysis of a five-compartment system with continuous infusion and its application to the study of amino acid turnover, 243
- Axes of rotational symmetry in protein structures (letter), 335
- Bacteria, radiation damage in, theoretical survival curves for, 383
- BEEK, B. (see ANNINOS, P. A.), 121
- (see HARTH, E. M.), 93
- Behaviour, fluctuating, and learning. Experiments with goldfish, 251
- Biconcave shape of the human red blood cell, minimum energy of bending as a possible explanation of, 61
- Biochemical systems analysis. III. Dynamic solutions using a power-law approximation, 215
- Biological reactions, water extrusion in, 481
- Bird sounds, a comment on graphic displays of, and analyses with a new device, the Melanograph Mona, 1
- Blood cell, human red, minimum energy of bending as a possible explanation of biconcave shape of, 61
- — populations, stress cycle analysis in the biocybernetic study of, 265
- BOGYO, T. P., BURNELL, D. G. & WU TING, S., Inbreeding function in small populations with an arbitrary number of linked loci, 33
- Brain functions and neural dynamics, 93
- BROCKWELL, P. J. & TRUCCO, E., On the decomposition by generations of the PLM-function, 149
- BURNELL, D. G. (see BOGYO, T. P.), 33
- CANHAM, P. B., The minimum energy of bending as a possible explanation of the biconcave shape of the human red blood cell, 61
- Canid phylogeny, karyotypic fissioning and, 445

- Cell populations, a mathematical model of synchronized periodic growth of, 373
- Chlamydomonas*, recombination of non-chromosomal genes in: assortment of mitochondria and chloroplasts? (letter), 337
- Chloroplasts and mitochondria, assortment of ? Recombination of non-chromosomal genes in *Chlamydomonas* (letter), 337
- Codon recognition: the allosteric ribosome hypothesis, 83
- Comment on graphic displays of bird sounds and analyses with a new device, the Melanograph Mona, 1
- CSERMELY, T. J. (see ANNINOS, P. A.), 121
- (see HARTH, E. M.), 93
- Determination of predator food preferences, 365
- Diffusion of ATP in sperm flagella, 11
- Dipeptides, simple, preliminary investigations, Molecular orbital calculations on the conformation of polypeptides and proteins. I, 321
- Dissipative structure, instabilities associated with, 227
- Domain effects in membrane transitions (letter), 497
- DREYFUS, M. (see MAIGRET, B.), 321
- Dynamics of neural structures, 121
- EDELSTEIN, B. B., Instabilities associated with dissipative structure, 227
- EIJKMAN, E. G., Learning and fluctuating behaviour. Experiments with goldfish, 251
- Fetal growth, Haase's law of, physical basis for (letter), 507
- α -Fibrous proteins, a proposed conformation for, 429
- Five-compartment system with continuous infusion and its application to the study of amino acid turnover, analysis of, 243
- Flagella, sperm, diffusion of ATP in, 11
- Food preferences, predator, determination of, 365
- FRANKE, E. K., A mathematical model of synchronized periodic growth of cell populations, 373
- Gaussian orbitals, a quantum-mechanical study of the peptide molecule using, 437
- GENCHEV, D. (see GOLOVINSKY, E.), 29
- (see KANETI, J.), 19
- Generations, on the decomposition by, of the PLM-function, 149
- Genes, non-chromosomal, recombination in *Chlamydomonas*: assortment of mitochondria and chloroplasts ? (letter), 337
- GOLOVINSKY, E., KANETI, J., YUKHNOSKY, I. & GENCHEV, D., A study of some orotic acid derivatives and analogues by Hückel's method of molecular orbitals. II. Analogues of the orotic acid in the reaction with phosphoribosyl-pyrophosphate, 29
- (see KANETI, J.), 19
- GRAY, W. M. (see KIRK, J.), 265
- Growth, fetal, Haase's law of, physical basis for (letter), 507
- of cell populations, synchronized periodic, a mathematical model of, 373
- GRUNSTEIN, E. & WYNN, J., A molecular mechanism of action of thyroxine: modification of membrane phospholipid by iodine, 343
